

Sunfix MF-CN is a new product and is able to dye on various dyeing process ; Exhaustion dyeing, continuous dyeing and cold pad-batch dyeing. It has high reproducibility and a minimum tailing and listing in pad dyeing. Sunfix MF-CN has good compatibility with Sunfix MF-D.

| Product Name | C.I. Reactive | Features | Dyeing application |
|--|---------------|--|---|
|  Yellow MF-CN | - | A golden yellow dye with good build-up and wash-off properties. Economical recipe in deep shades. Basic yellow dye of Sunfix MF-CN | warm exhaustion cold pad-batch continuous |
|  Orange MF-CN | - | Economical orange dye in deep and ultra shades. Outstanding build-up and wash-off properties. Good dischargeability and all round wet fastness properties. | warm exhaustion cold pad-batch continuous |
|  Red MF-CN | - | Slightly bluish red dye with good build-up property . Reduced recipe costs in ultra deep shades. Good fastness to chlorinated water | warm exhaustion cold pad-batch continuous |
|  Deep Red MF-CN | - | Good build-up and wash-off properties. Very high fixation yield. Reduced recipe costs in deep shades. Excellent dischargeability. | warm exhaustion cold pad-batch continuous |
|  Blue MF-CN | - | Economical deep blue shade with good build-up property. | warm exhaustion cold pad-batch continuous |
|  Navy Blue MF-CN | - | Greenish navy blue dye with good build-up. An economical navy blue dye for deep shades. Good dischargeability. Very suitable for pad dyeing process. | warm exhaustion cold pad-batch continuous |
