

Sunfix MF-D is advanced reactive dye for ultra deep shades. It is suitable for 60? exhaustion dyeing . It has high color strength chromophore and multi-functional reactive groups. You can reduce the amount of dyestuff usage almost up to 50% and reduce wastewater treatment cost due to less unfixed dye in its wastewater.

Product Name	C.I. Reactive	Features	Dyeing application
 Yellow MF-D (N)	-	Basic yellow dye of Sunfix MF-D series. A golden yellow dye with good build-up and wash-off properties. Economical recipe in deep shades. Good dischargeability	warm exhaustion cold pad-batch continuous
 Orange MF-D	-	Economical orange dye in deep and ultra shades. Outstanding build-up and wash-off properties. Good dischargeability and all round wet fastness properties.	warm exhaustion cold pad-batch continuous
 Red MF-3G	-	Yellowish red dye with scarlet shade. Good build-up and wash-off properties. Reduced recipe costs in deep shades.	warm exhaustion continuous
 Red MF-D (N)	-	Yellowish red dye with scarlet shade. Reduced recipe costs in deep shades. Good all round wet fastness properties. Basic red dye of Sunfix MF-D series.	warm exhaustion cold pad-batch continuous
 Red MF-2BD	-	Slightly bluish red dye with outstanding build-up . Reduced recipe costs in ultra deep shades.	warm exhaustion continuous
 Red MF-2BS	-	Slightly bluish red dye with good build-up property . Reduced recipe costs in ultra deep shades. Good fastness to chlorinated water	warm exhaustion cold pad-batch continuous
 Red MF-3BD	-	Good build-up property. High fixation yield. Bluish red where high wet fastness required.	warm exhaustion cold pad-batch continuous
 Red MF-3BS	-	Economical deep red shade with high build-up property.	warm exhaustion cold pad-batch continuous
 Red MF-SB	-	Deep red dye for ultra deep shades Suitable for bordeaux shades. High fixation yield and reduced recipe costs.	warm exhaustion cold pad-batch continuous
 Dark Blue MF-D	-	Economical deep blue dye with high build-up property. White dischargeable.	warm exhaustion cold pad-batch continuous
 Navy Blue MF-D (N)	-	Good build-up and wash-off properties. Good all round wet fastness properties.	warm exhaustion cold pad-batch continuous
 Navy Blue MF-BD	-	Good build-up and wash-off properties. Good all round wet fastness properties.	warm exhaustion cold pad-batch continuous
 Navy Blue MF-RD	-	Reddish navy blue dye with good light fastness property. Good build-up and wash-off properties. Widely used as an economical blue componet in deep shades.	warm exhaustion cold pad-batch continuous
 Navy Blue MF-GD	-	Greenish navy blue dye. Good build-up and wash-off properties. Widely used as an economical blue componet in deep shades.	warm exhaustion cold pad-batch continuous
